

Project2

Data Analysis and Visualization

Done by: Betool Aljuraish

NEW INFORMATION: The most critical data to collect was related to the distance to the food court and policy changes, based on the following figure.

ASSIGNMENT: In this assignment, you are to describe the logical steps to developing an action plan to address key points discovered during analysis and subsequently, develop an action plan. In addition, you are to outline how your plan may affect other situations.

1. Describe the logical steps to developing an action plan:

1. Determine the goals (Long and short terms) and **What** are actions performed to achieve these goals.
2. **Who's** responsible for each action?
3. **When?** The completion dates.

2. The Action plan based on most critical data to collect was related to the **distance to the food court and policy changes.**

Goals (Data)	Action	responsible	Time of performs
1. Make the food courts near apart to the visitor gathering area.	By transmitting all the zone of restaurants to another place to make near apart to visitor gathering area to decrease the pathway and without being there are fences.	Facility Manager	2 weeks – 1 month
2. Provide a golf car to make a transmission easy to the restaurants area.	By provider make a character of the specific restaurant drives the golf car to transmit the visitor directly to the restaurants.	Children's Programming Manager	Through 1 week.
3. Change the policy of entry.	By preventing the coolers from entry and preventing re-entry to reduce the outside purchases.	Business Manager	1 week.

3. The effect may result from an action plan:

1. The effect from transmitting the restaurant zone that may make a lot of losses recourses (like materials re-build spend in stalls).
2. Spending on providing golf cars may make affect the revenue.
3. May affect the policy change on customer loyalty and satisfying.
